The never-ending evolution of power supplies!

Ultra-Compact AC/DC Programmable Power Supply

PCR-WEA/WEA2 Series

Compact size: 6 kVA in 6U size (PCR6000WEA2)
Up to 36 kVA in one single unit
100% regenerative capability (for "R" models, PCR-WEA2R)
Expandable up to three-phase 540 kVA
***Please contact us if you wish to operate more than 4 units in parallel**
Flexible digital interface: LAN (LXI), USB, RS232C, GPIB (option)
Power line disturbance simulation
Power-saving function
DC output (100% of rated power)
Output frequency up to 5 kHz
Output rating: AC 0 to 320 Vrms, DC 0 to ±452 V

THE EVOLUTION

More power, more speed, more freedom! While maintaining the high-power density of 6 kVA/6U and 36 kVA in a single housing unit, the maximum output voltage, response characteristics, and load stability have been improved!

Ultra-Compact AC/DC Programmable Power Supply

PCR-WEA/WEA2 Series

The PCR-WEA/WEA2 is a series of multifunctional switching AC power supplies that combines accurate, high-power output with an ultra-compact design. The 15 model line-up ranges from 1 kVA to 36 kVA AC/DC with single & 3-phase variable output from 6 kVA and up. The PCR-WEA2R also features a regenerative mode[*1] that can drastically reduce power consumption and cut operating costs.
The PCR-WEA2/WEA2R also supports parallel operation up to maximum of three-phase 540 kVA for large-scale test systems.[*2] Output frequency up to 5 kHz is also available with all models, which is critical for AC applications in avionic industries.

PCR6000WEA2
PCR6000WEA2R

Refer to pg.16 for full scale.

- **Compact size: 6 kVA in 6U frame (PCR6000WEA2)**
- **Up to 36 kVA in a single unit (PCR36000WEA2)**
- **100% regenerative-power capability[*1]**
- **Expandable up to three-phase 540 kVA[*2]**
- **Flexible digital interface:**
  LAN (LXI), USB, RS232C, GPIB (option)
- **Power line disturbance simulation features**
- **Sequence function for advanced simulation**
- **External analog, digital control function (standard)**
- **Power-saving function**
- **DC output (100% of rated power)**
- **Output frequency up to 5 kHz**
- **Output rating: AC 0 to 320 Vrms, DC 0 to ±452 V**
- **Analog monitor output (factory option)[*3]**

*1: Only "R" models (PCR-WEA2R) with 3-phase 200 V/400 V input.
For regeneration within the installation site only.
*2: Please contact us if you wish to operate more than 4 units in parallel.
*3: 6 kVA models and higher

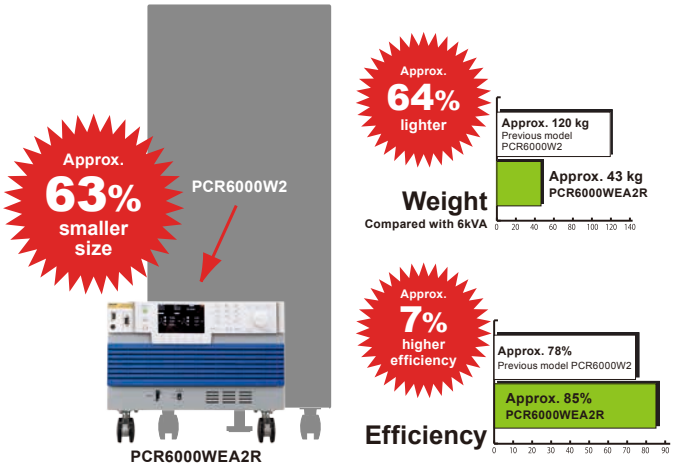
PCR36000WEA2
PCR36000WEA2R

PWM Inverter Type - Programmable AC Power Supply
The PCR-WEA/WEA2 Series brings new innovations to the power-electronics industry.

Compact Size!

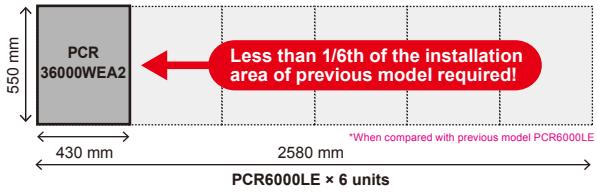
Compared to our previous PWM models, the size of the PCR-WEA has been drastically reduced by 60%. Efficiency has also been increased by approximately 7%, for an overall high efficiency of approximately 85%.



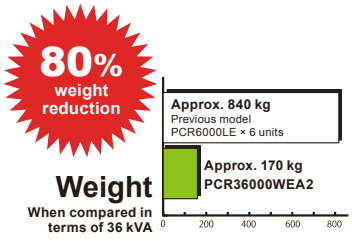
Extremely Power Dense 36 kVA Chassis

The PCR-WEA/WEA2 form factor has been significantly improved, occupying the absolute minimum amount of precious space in your testing facility. The form factor is even further optimized in high power models.

● Installation area comparison (36 kVA)
The PCR-WEA/WEA2 is only 1/6th the size of the PCR-LE!



● Weight comparison (36 kVA)
The PCR-WEA/WEA2 is approximately 80% lighter than the PCR-LE!

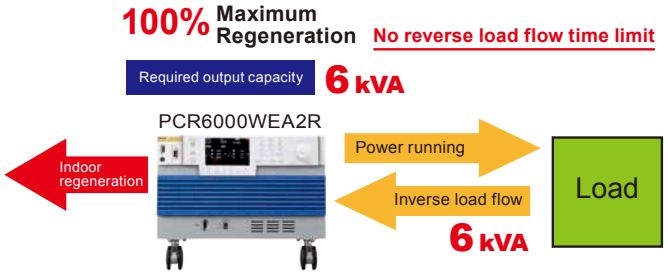


Low Ripple Noise

Achieves an extremely low switching noise for a PWM inverter-type AC power supply, with ripple noise as low as 0.25 Vrms.
The PCR-WEA series even boasts similar noise performance with the PCR-LE/LE2 linear amplifier power supply series. The compact, high-power design of the PCR-WEA/WEA2 has been achieved with absolutely no compromises to ripple noise performance.

100% Regeneration Capability, No Time Limit

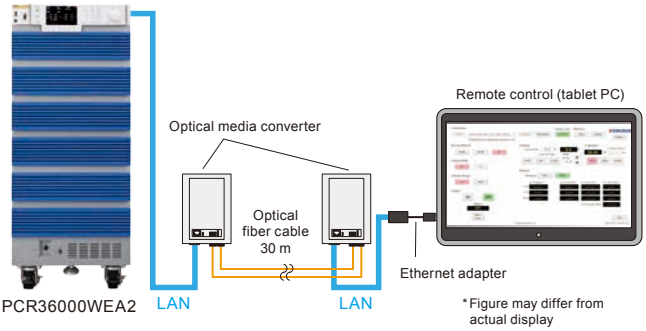
The PCR-WEA2R models are capable of 100% power regeneration. The power regeneration feature is available with absolutely no reverse load flow time limit. (30% for PCR-LE/LE2)
*Regeneration is limited within installation site. Only available in "R" models (PCR-WEA2R) with 3-phase 200 V/400 V input.



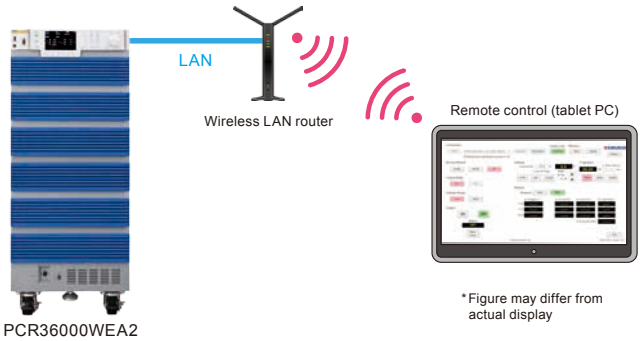
LAN, USB, RS232C Standard Digital Interface

The PCR-WEA/WEA2 series includes a flexible digital interface for users utilizing LAN, USB, and RS232C communication interfaces (GPIB factory option available). LAN connection is LXI compliant, allowing you to monitor and control your device wherever you are via computer, smartphone, or tablet web browser. This feature is particularly important when conducting critical AC tests in anechoic chambers/shield rooms. Additionally, the PCR-WEA can be controlled directly with easy remote-control software for customers with limitations in external communication.

● Wired LAN connection (optical cable)



● Wireless LAN connection



Output Frequency up to 5 kHz

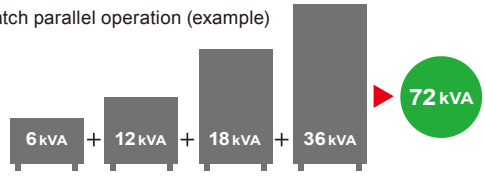
It has a maximum output frequency up to 5 kHz for critical applications in the defense and avionics industries. The frequency performance of the PCR-WEA allows for simulation of sharp voltage fluctuations required for airborne electronic equipment testing. Furthermore, the compact 6kVA/6U form factor allows for the easy preparation of an automated, one-rack testing system without requiring a costly, specialized power source installation space.

Expandable up to three-phase 540 kVA

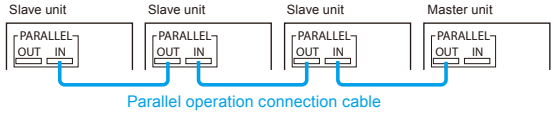
Parallel operation is available on all models by simply connecting an optional parallel operation cable. This feature is available even among different models for a wide range of high power.

*Same input voltage and wiring system required for 6 kVA models and higher.
*Please contact us if you wish to operate more than 4 units in parallel.

● Mix-and-match parallel operation (example)

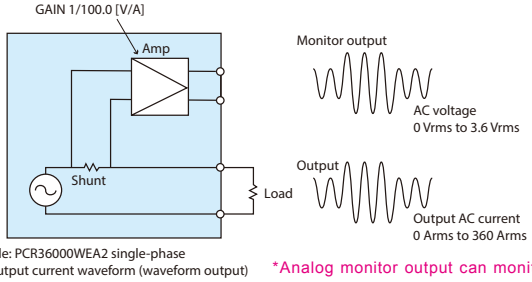


● Connection diagram



Analog Monitor Output (Factory option)

Instantaneous voltage / current values can be output as voltage waveforms without using a differential probe or current sensor.
It is also possible to output the instantaneous value of the power value.
*6 kVA models and higher

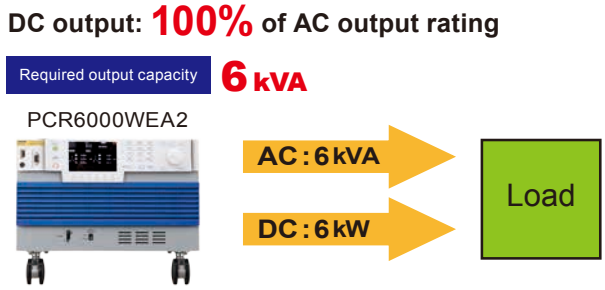


Example: PCR36000WEA2 single-phase
Output current waveform (waveform output)

*Analog monitor output can monitor up to 3 outputs by selecting either voltage or current.

DC Output 100% of Rated Power

The PCR-WEA/WEA2 series enables DC output up to 100% of the AC rated power output.

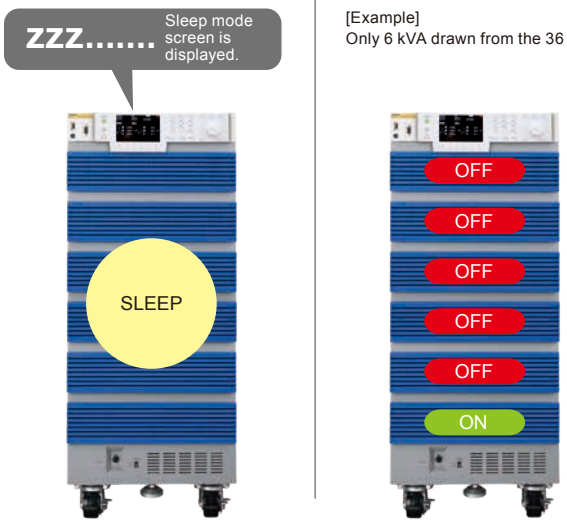


Power Saving Mode *6 kVA models and higher

●Sleep mode
If the PCR-WEA/WEA2 does not detect output for a certain amount of time, the power unit will go into "sleep mode" and cut power consumption.

●Power-saving mode
The power-saving feature allows the PCR-WEA to cut the costs of operation by drawing power from only the necessary power modules required to reach the output setting.

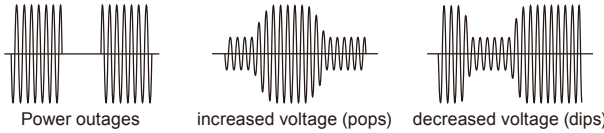
[Example]
Only 6 kVA drawn from the 36 kVA model



Modular design allows for simple maintenance
Each separate power module can be removed and replaced for maintenance and calibration. *For models 6 kVA and higher

Power Line Error Simulation

The PCR-WEA/WEA2 series can simulate various power line abnormalities such as power outages, voltage drops (dips) and voltage increases (pops). This feature is useful for the testing of power-source switches and various electronic devices.



Power outages | increased voltage (pops) | decreased voltage (dips)

Built-in parallel operation driver software! Easy parallel operation with a single connection cable.

The PCR-WEA/WEA2 series can be easily configured in a parallel connection with a single cable* per connection for all models 6 kVA and above. This cable can be used in synchronization with a power-interlock cable* to control the ON/OFF status of master/slave units. *Optional

Performance

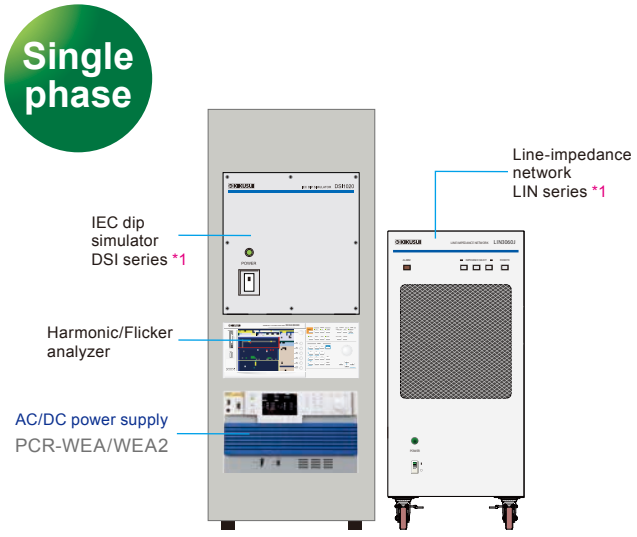
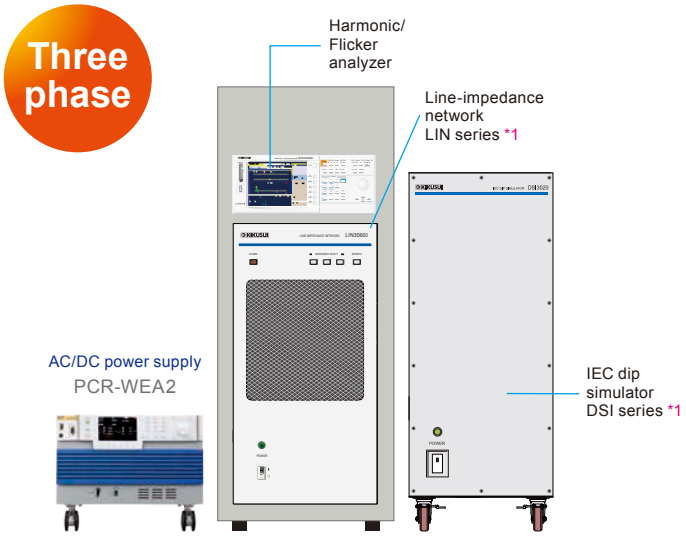
Applications

For Standard Compliance Testing

● Single-phase system



● Three-phase system



This system can simulate various conditions of phenomena occurring in AC power environments. It can be used for immunity tests of electrical and electronic devices, which are connected to a low-voltage distribution system, or which have DC power input ports, under the standard conditions as specified to the right. The test conditions can be set outside the standard range, allowing the system to be used for preliminary tests prior to standard tests, immunity-margin tests, and stress tests. The KHA3000 harmonic/flicker analyzer combines a PCR-WEA/WEA2 Series AC power supply, LIN Series line-impedance network *1, DSI series IEC dip simulator and application software(Refer to pg.8), allowing tests that conform to IEC standards and JIS standards.

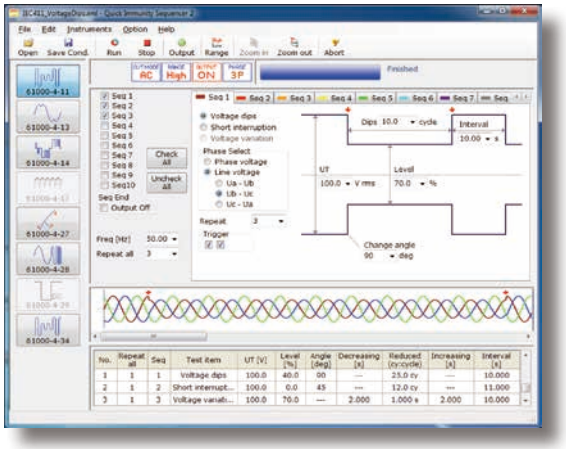
The latest standards for IEC61000-4 supported!



"Quick Immunity Sequencer 2" (model name: SD009-PCR-LE/WE) is an application software for immunity testing with the AC power supply PCR-WEA/WEA2 series system, based on the power line disturbance standard (IEC61000-4 Series) for the immunity testing of the EMC standard. Not only can it be used for compliance testing based on the latest standards or for some types of preliminary testing, but the software can be also employed for advance checking in development phases and for immunity margin tests, because it allows extended testing conditions to be set as needed.

*1 Conforms to the standard when used in combination with IEC Dip Simulator DSI series. If using the PCR-WEA/WEA2 alone, the voltage dips and short-time power failures are preliminary tests.
*2 110 %, 95.2 %, 93.5 %, 90 %, 87 %, 80 %, 74 %, 71 %, 66 % need to respond to sudden changes of 1 µs to 5 µs. The voltage response of PCR-WEA/WEA2 is more than 40 µs at FAST, which is a preliminary test.
*3 Must support output impedance greater than 100 kΩ. The PCR-WEA/WEA2 output impedance is less than 100 kΩ and therefore designed for preliminary testing purposes. Only PCR12000WEA2R conforms to the standards.
*4 The device between the range of 16A to 75 A requires having the capability of rapid change with 1 µs to 5 µs. The device exceeding 75 A is not required to have the capability of rapid change with 1µs to 5 µs. (It is relaxed to 1 µs to 50 µs for the device exceeding 75 A.)

Avionics Test Software

SD012-PCR-LE/WE

Supported Standards
Military Standard:MIL-STD-704A/E/F
Civilian Standard:RTCA DO-160F/G
Civilian Standard:JIS W0812:2004

"MIL-STD-704" and "DO-160" tests can be easily performed!

Avionics Test Software is software for power standards testing of onboard aircraft equipment. It corresponds to the defense standard "MIL-STD-704", civilian standard "DO-160," and "JIS W0812".

■ Easy to use
Simply select the test item and choose the number you wish to run from the test list.

■ Test items can be edited and saved
It is possible to create dedicated tests for development evaluation and simple confirmation tests.

■ CSV output
Supports measurement data during testing and the output of test reports.

■ Supports 360 V DO-160 Abnormal Test
Surge Voltage 360 V testing of the DO-160 230 V AC system is possible in combination with OT03-PCR-WEA.

* Separate PBZ20-20A series bipolar power supply is required when performing the SD-160 Section 18 test.
* Please contact us for the MIL-STD-461 CS101 test.

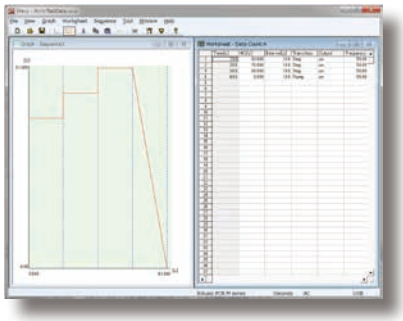
"Wavy" sequence creation software

SD032-PCR-WE (Wavy for PCR-WE)

The software extends the feature of waveform generation and sequence functions.
Easy sequence control without programming knowledge!

Trial version available on website!
https://global.kikusui.co.jp/downloads/
Download !



▲Commandcontrol

▲Direct control

◀Graph viewer/Configuration

Wavy is an application software that supports sequence creation and the operation for Kikusui power supplies and electronic loads.
Wavy allows you to create and edit sequences visually with a mouse without programming knowledge.

- Makes it easier to create or edit the test-condition file required for the sequence operation.
- By using the storage function of test-condition data file, it enables you to manage the test condition of the standard routine test.
- The progress of execution sequence will be displayed in "practical dialogue" with the setting value and the cursor.
- It is possible to observe the intuitionistic output through the "monitor graph" that plots the ongoing monitor value.
- You can save the acquired monitor data as a test result.
- Added "waveform image" window let's you easily keep track of the AC signal.
- Allows you to edit and create a new arbitrary waveform easily. You can instantly write and then output the created arbitrary waveform.
- You can select or deselect the pause function, trigger function, AC waveform etc. as necessary.

Remote-control software for Windows tablet

SD021-PCR-LE/WE (RMT CONT SOFTWARE FOR PCR-LE/WE)

Windows tablet can be used as a remote controller !

The SD021-PCR-LE/WE is software that can control the PCR-WEA/WEA2 Series. It is capable of changing the setting condition of the "wiring method", "output mode", "voltage range", "voltage value", and "frequency value". And the settings changed by remote control can be saved and recalled. Moreover, it can display the measurement value of the AC power supply. Remote operation and control of the AC power supply can be easily achieved from a distance.

Specifications

Unless specified otherwise, the specifications are for the following settings and conditions.
• The warm-up time is 30 minutes (with current flowing). • TYP: These are typical values that are representative of situations where the product operates in an environment with an ambient temperature of 23°C. These values do not guarantee the performance of the PCR-WEA/WEA2.
• setting: Indicates a setting. • reading: Indicates the readout value. • f.s: Indicates full scale.

*1 output L range, output H range *2 Specification guaranteed voltage range is 1 V to 160 V/ 2 V to 320 V (AC) and 1.4 V to 226 V/ 2.8 V to 452 V (DC) *3 At ambient temperature of 23 °C±5 °C. *4 No load, output frequency 45 Hz to 65 Hz *5 When the phase angle of 120° of each phase. *6 For output phase voltage of 100 Vac to 160 Vac/ 200 Vac to 320 Vac and output voltage of 100 Vdc to 226 Vdc/ 200 Vdc to 452 Vdc, output current is reduced with output voltage. When the output frequency is between 1 Hz and 40 Hz, the output current is reduced by the output frequency. The output current is 70 % at 1 Hz. *7 On the 500 Hz limit model, the frequency is limited to 1 Hz to 500.0 Hz for three-phase output. *8 Within ±(0.4° + 2.5 μs×360°×fo×10^3). The following show the angles obtained by calculating the expression with the specified frequency, within ± 0.5° (at 60 Hz output), within ± 0.8° (at 400 Hz output)
*9 With no load at 23°C±5°C. *10 When the output voltage is 100 V or 200 V, the output current is the rated value, the load power factor is 1, and the output frequency is between 40 Hz and 1 kHz. *11 Repeated output is possible when the crest factor is 4. *12 125 Vac/ 250 Vac (output L range/ H range) *13 Waveform bank 0, at 1 Hz to 500 Hz.

Regeneration Function

Only for three-phase, three-wire input models with R at the end of the model name. Single-phase output models and three-phase, four-wire input models do not have a regeneration function. For regeneration within the installation site only.

Model		Single-phase/three-phase switchable model					
		PCR 6000WEA2R	PCR 12000WEA2R	PCR 18000WEA2R	PCR 24000WEA2R	PCR 30000WEA2R	PCR 36000WEA2R
Maximum regenerated power *1		6 kVA	12 kVA	18 kVA	24 kVA	30 kVA	36 kVA
Maximum reverse power flow current *1 *2	1P2W	60 A / 30 A	120 A / 60 A	180 A / 90 A	240 A / 120 A	300 A / 150 A	360 A / 180 A
	1P3W 3P	20 A / 10 A	40 A / 20 A	60 A / 30 A	80 A / 40 A	100 A / 50 A	120 A / 60 A
Regeneration efficiency *3		85 %(TYP)					
Output current harmonic distortion		THD: 5 % and less, each harmonic: 3 % and less (2nd to 40th)					

*1 When the output phase voltage is between 100 Vac and 161 Vac or 200 Vac and 322 Vac, the output current is reduced by the output voltage.
When the output frequency is between 1 Hz and 40 Hz, the output current is reduced by the output frequency. The output current is 70 % at 1 Hz.
*2 When the output voltage is 100 V or 200 V and the output frequency is between 40 Hz and 1 kHz (when the current phase is -90 deg to -180 deg or 90 deg to 180 deg relative to the output voltage)
*3 When the output voltage is 100 V or 200 V, the output current is the rated value, sine wave, the load power factor is 1, and the output frequency is between 45 Hz to 65 Hz.

Output Voltage Stability (Phase Voltage)

Accessories		Cable tie (4 pcs.), External control(DIGITAL I/O) connector (1 pc.), Heavy object warning label (1 pc.)*Excludes PCR1000WEA, Read This First! (1 copy), Quick Reference(1 sheet), CD-ROM (1 disc), Safety Information (1 copy)								

*1 Does not apply to specially ordered or modified products.
*2 Only on models that have the CE marking on the panel.
*3 This is Class A equipment. This product is intended for use in an industrial environment. This product may cause interference if used in residential areas. Such use must be avoided unless the user takes special measures to reduce electromagnetic emissions to prevent interference to the reception of radio and television broadcasts.
*4 This is Group 1 equipment. This product does not generate and/or use intentionally radio-frequency energy, in the form of electromagnetic radiation, inductive and/or capacitive coupling, for the treatment of material or inspection/analysis purpose.
*5 This does not apply to the PCR6000WEA2R (3-phase 3-wire 200V input model).
*6 This is Class I equipment. Be sure to ground this product's protective conductor terminal. The safety of this product is only guaranteed when the product is properly grounded.
*7 Pollution is addition of foreign matter (solid, liquid or gaseous) that may produce a reduction of dielectric strength or surface resistivity. Pollution Degree 2 assumes that only non-conductive pollution will occur except for an occasional temporary conductivity caused by condensation.
*8 Only on models that have cTUVus marking on the panel.

Limit Values and Protection Functions (Common Specification)

			Setting range	Setting resolution
Voltage protection	AC voltage upper limit AC voltage lower limit		0.0 V to 322.0 V	0.1 V
	DC voltage upper limit DC voltage lower limit		-455 V to 455 V	0.1 V
	Output overvoltage protection(OVP)	Rms value	14.0 V to 500.5 V	0.1 V
		Positive peak value Negative peak value	14.0 V to 500.5 V -500.5 V to -14.0 V	0.1 V
	Power module overvoltage protection		Fixed	—
	Output undervoltage protection (UVP)		0.0 V to 500.5 V	0.1 V
Frequency protection	Frequency upper limit Frequency lower limit		1 Hz to 5000 Hz 500 Hz LMT model: 1 Hz to 500 Hz (Three-phase output)	0.01 Hz (1.00 Hz to 100.0 Hz) 0.1 Hz (100.0 Hz to 1000 Hz), 1 Hz (1000 Hz to 5000 Hz)
Current protection	Current limit *1		Maximum output current × 0.1 to maximum output current × 1.1	0.01 A (0.35 A to 100.0 A), 0.1 A (100.0 A to 1000 A)
	Positive peak current limit Negative peak current limit *2		Maximum output current × 0.1 to maximum output current × 4.2	
Overheat protection	Power module overheat protection		Fixed	—
	Fan error		Fixed	—
Overload protection			Rated current or current limit	Current limit resolution
Independent operation detection			Fixed	—
Sensing error detection			±(10 % +10 V) with respect to the output terminal voltage	—

*1 The current that can actually be supplied is 1.1 times the rated current or the current limit, whichever is less.
*2 The current that can actually be supplied is the maximum peak current or the current limit, whichever is less.

Communication Interface (Common Specification)

USB	Complies with the USB 2.0 specifications; data rate: 480 Mbps (high speed), socket B type, self-powered, Complies with the USBTMC-USB488 device class specifications.
LAN	IEEE802.3, 100Base-TX Ethernet LXI Rev.1.5 2016 (extended functions: VXI-11, HiSLIP, IPv6), data rate: 100 Mbps (auto negotiation, full speed) AUTO MDIX function IPv4, RJ45 connector, category 5, straight cable Complies with SCPI Specification 1999.0
RS232C	Complies with the EIA232D specifications, asynchronous full duplex, D-SUB 9-pin connector (male), crossover cable (null modem), 9600bps/19200bps/38400bps/57600bps/115200bps
GPIB (option)	Complies with IEEE Std 488.1-1987 SH1, AH1, T8, L4, SR0, RL0, PP0, DC0, DT0, C0, E1 24-pin connector (receptacle)

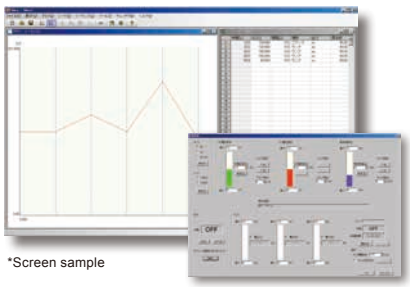
■ Sequence Creation Software "Wavy"
SD032-PCR-WE (Wavy for PCR-WE)



*Screen sample

The software that further enhances the waveform generation and sequence functions of the PCR-WEA/WEA2 Series.
Easy sequence control without programming knowledge!

Wavy is an application software that supports sequence creation and operation for Kikusui power supplies and electronic loads. Wavy allows you to create and edit sequences visually with just a mouse. Real-time graph-monitor function is equipped and enables monitoring and logging values of voltage and current. It is possible to operate the power supply with the feeling of remote control by direct control function.

■Output Terminal Box

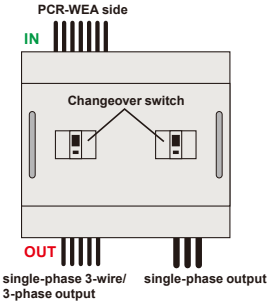
Easy to select output mode “single-phase, single-phase 3-wire, and 3-phase” without re-wiring.

- 2 lineups depend on output power, “6 kVA to 18 kVA model” and “24 kVA to 36 kVA model”.
- Toggle between “single-phase” or “single-phase 3-wire/3-phase” output terminal using main unit switch.

An output terminal box gives output mode selection “single-phase, single-phase 3-wire and 3-phase” of PCR-WEA/WEA2 series.
Selectable switches equipped in its body achieve multi-phase output without output cable re-wiring.

Input terminal surface

Output terminal surface



Connection concept diagram

■ Lineup

	Model
Output terminal box (18 kVA)	**OT01-PCR-WE**
Output terminal box (36 kVA)	**OT02-PCR-WE**

■ Connecting cable

	Model
For 6 k, 12 kVA (0.7 m)	**AC14-7P0.7M-M5M6**
For 6 k, 12 kVA (1.4 m)	**AC14-7P1.4M-M5M6**
For 18 kVA (0.7 m)	**AC22-7P0.7M-M6M6**
For 18 kVA (1.4 m)	**AC22-7P1.4M-M6M6**

	Model
For 24 kVA (0.7 m)	**AC22-7P0.7M-M6M8**
For 24 kVA (1.4 m)	**AC22-7P1.4M-M6M8**

For 30 k, 36 kVA (1.4 m)	**AC38-7P1.4M-M8M8**

■ Specification

Item		OT01-PCR-WE	OT02-PCR-WE
Connectable AC power supplies		PCR6000WEA2(R), PCR12000WEA2(R), PCR18000WEA2(R)	PCR24000WEA2(R), PCR30000WEA2(R), PCR36000WEA2(R)
Input/Output maximum rating (AC)	Maximum voltage (phase voltage)	320 Vac	
	Maximum current (Single-phase 2 wire)	180 Aac	360 Aac
	Maximum current (Single-phase 3 wire/3-phase)	60 Aac	120 Aac
	Frequency	45 Hz to 400 Hz	
Input terminal	Type	M6 × 7P screw terminals	M8 × 7P screw terminals
	Arrangement/Quantity	U-V-W-N-N-N-G /1 piece	
Output terminal (Single-phase 2 wire)	Type/Arrangement/Quantity	M10 × 3P screw terminals/ L-N-G / 1 piece	
Output terminal (Single-phase 3 wire/3-phase)	Type	M6 × 5P screw terminals	M8 × 5P screw terminals
	Arrangement/Quantity	U-V-W-N-G /1 piece	
Dimensions(W×H×D)/Weight		445 mm×215 mm×410 mm / Approx. 13 kg (28.7 lb)	445 mm×270 mm×410 mm / Approx. 19 kg (41.9 lb)

■6 kVA single-phase/three-phase output transformer **OT03-PCR-WEA**

DO-160 AC 230 V system Surge Voltage 360 V test is possible!

The OT03-PCR-WEA high-voltage transformer is a step-up transformer that can be used with the PCR-WEA series and the SD012-PCR-LE/WE avionics test software. Depending on the wiring, a single unit with 4U and 6 kVA output can be used in a single-phase or three-phase configuration.

■ OT03-PCR-WEA

- The device is designed to perform high-voltage tests on avionics equipment. Thanks to the built-in step-up transformer, it can handle 360 V DO-160 abnormal tests.
- Maximum output voltage: 440 Vrms
- Input voltage range: 100 V to 320 Vrms
- Voltage conversion ratio: input [1], output [1.34]
- Frequency range: 45 Hz to 1200 Hz
- THRU mode: High-voltage tests and routine tests can be performed without reconnection.
- The standard number of units in parallel: 2 units (12 kVA)
  * Please consult us if you would like to use more than two units.
- Software control and the digital I/O ports used in the PCR-WEA series can be used without adjustments.
- Voltage sensing function: In addition to the main unit's sensing terminal, the voltage compensation function of the SD012 enables stable 360 V output even in the 800 Hz band.

Input power test system for onboard aircraft equipment

The input power supply test system for onboard aircraft equipment is a test system consisting of the AC power supply PCR-WEA series, the high-voltage transformer OT03-PCR-WEA, and the SD012-PCR-LE/WE avionics test software. The SD012-PCR-LE/WE can be used for various power input tests required by DO-160Section 16. Also, since the SD012-PCR-LE/WE includes the defense standard MIL-STD-704E/F, it can be used to test both commercial and defense aircraft components. It offers a highly versatile, all-in-one testing environment.

- Maximum capacity: AC 12 kVA / DC 12 kW
- Compatible voltages: AC 115 V series / AC 230 V series
- Wiring method: Switchable between single-phase and three-phase
- Testable frequencies:
  DC / 400 Hz / 360 Hz to 650 Hz / 360 Hz to 800 Hz

* To use OT03-PCR-WEA, SD012-PCR-LE/WE Ver. 2.00 or later is required.
* When conducting the DO-160 Section 18 test, a separate bipolar power supply PBZ20-20A series is required.
* Please contact us for the MIL-STD-461 CS101 test.

The never-ending evolution of power supplies!

PCR WEA/WEA2 SERIES
AC POWER SUPPLY

PCR-WEA/WEA2 Series

1. Output voltage up 310 Vrms ▸▸▸ **320 Vrms**
2. Transient response - response speed 55 µs ▸▸▸ **40 µs**
3. Output impedance reduction ▸▸▸ **Reduced by 50 %**
4. Improved output stability. ▸▸▸ **Increased stability in SLOW mode.**
5. Interface options ▸▸▸ **Analog monitor output**

● Comparison with previous model

Model	PCR-WE/WE2 Series	PCR-WEA/WEA2 Series
Firmware	Ver 1.24	Ver 3.12 or later
Basic function	Output voltage 155/310 Vrms ±219/438 Vdc	Output voltage 160/320 Vrms ±226/452 Vdc
Applied functions	Same value regardless of the lower limit response setting for output impedance (reactance component).	Lower limit of output impedance (reactance component) FAST : reduced by 50 % MED : no change SLOW : 3x
Interface	None	Addition of analog monitor output option (factory option) * 6 kVA models and higher
